

Project Objectives

Date	13 November 2022
Team ID	PNT2022TMID50197
ProjectName	Project-IoTBasedSafetyGadgetForChild SafetyMonitoring& Notification

- The major goal of this project is to use modern technology to create a gadget that provides "Smart Child Safety" to protect children
- The purpose of this device is to help parents crying children notification to mobile their children with ease.
- The proposed system intends to a device wireless technique in the form of embedded device for children that will serve the purpose of alerts and way of.
- We can monitor the child 24/7 in real time through the help of this live streaming which makes parents feel that they are beside their children ensuring children's safety.
- A smart IoT device for child safety and notificationis developed to help the parents to crying child monitor their children.
- This work mainly focuses on alerting the individuals around baby so as to sense the baby in safer zone before arrival of the parent
- The purpose of this device is to help parents to feel their children with ease.
- The main aim of the project is to provide safe to the child.
- Project aims at providing parents with a sense of security for their child in today's time.
- Enable tracking of the child's safety and capturing of data remotely such as temperature, pulse, respiratory rate, quality of sleep and many more. To show the child'sactual data with reference values

- Enable sending of notification if the child is out of crying or when the device realizes abnormal conditions/situations.
- Develop a prototype of IoT wearable smart band connected to parents' mobile apps so that they can monitor the actual condition of children at anytime and anyplace.
