

## Develop The Web Application Using Node-RED

### Aim:

Develop the web application using Node-RED.

### Steps Followed:

1. Opened a Node-RED project

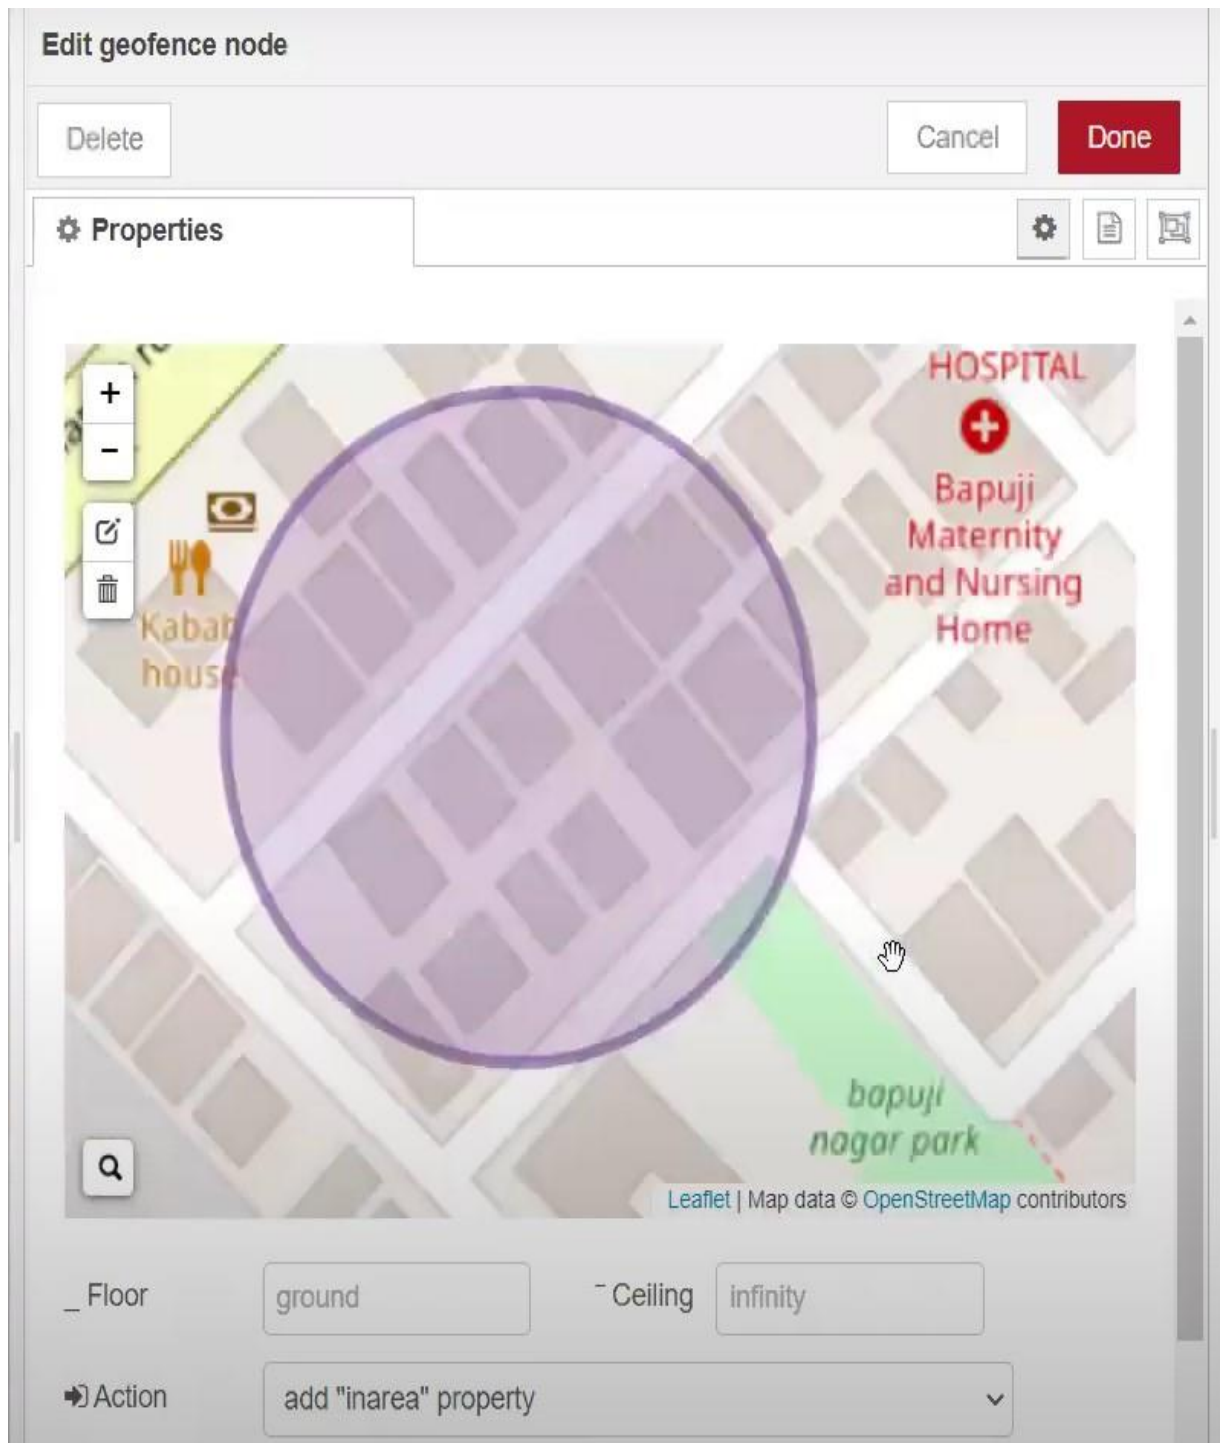

2. Added code to get child location in python

```
untitled
File Edit Format Run Options Window Help
import json
import wiotp.sdk.device
import time
import ibmiotf.application
import ibmiotf.device

myConfig = {
    "identity": {
        "orgId": "qm8fs3",
        "typeId": "Nodemcu",
        "deviceId": "56432"
    },
    "auth": {
        "token": "142n22r23s"
    }
}

Client = wiotp.sdk.device.DeviceClient(config=myConfig, logHandlers=None)
Client.connect()
Client.connect()
While True:
    Name= "childsafety"
    #in area location
    latitude= 17.4225176
    longitude= 78.5458842
    #out area location
    #Latitude= 9.28
    #Longitude= 78.5488783
    mydata={'name':name, 'lat':latitude, 'lon':longitude}
    Client.publishEvent(eventId="status",msgFormat="json",data=mydata, qos=0, onPublish=None)
    Print("Data published to IBM IoT platform:",mydata)
    Time.sleep(20)
Client.disconnect
```

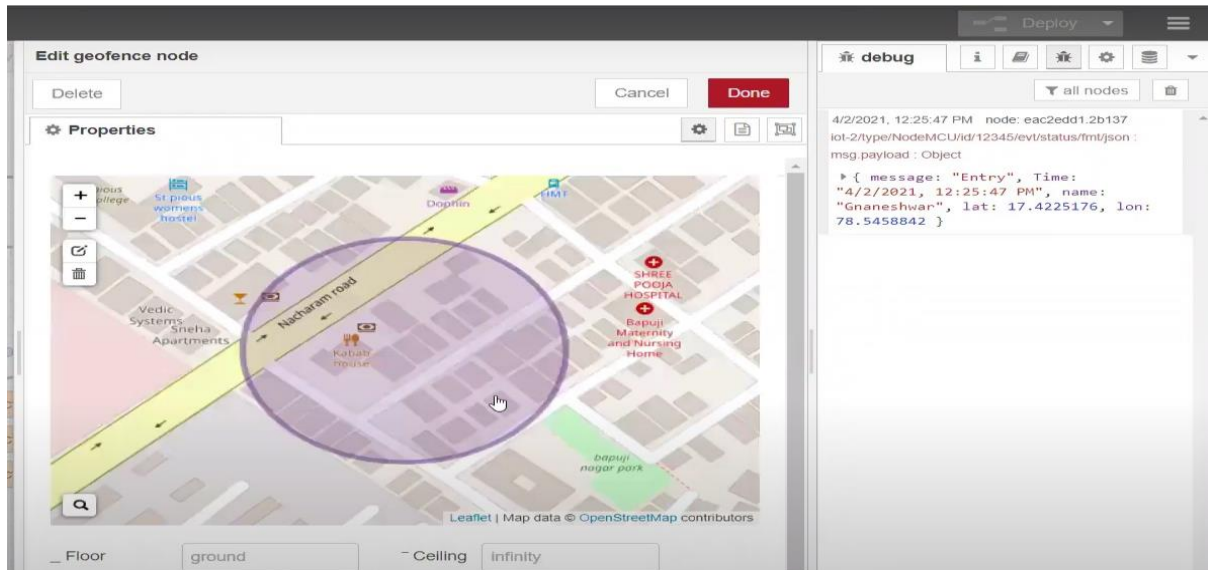

3.created the geofence

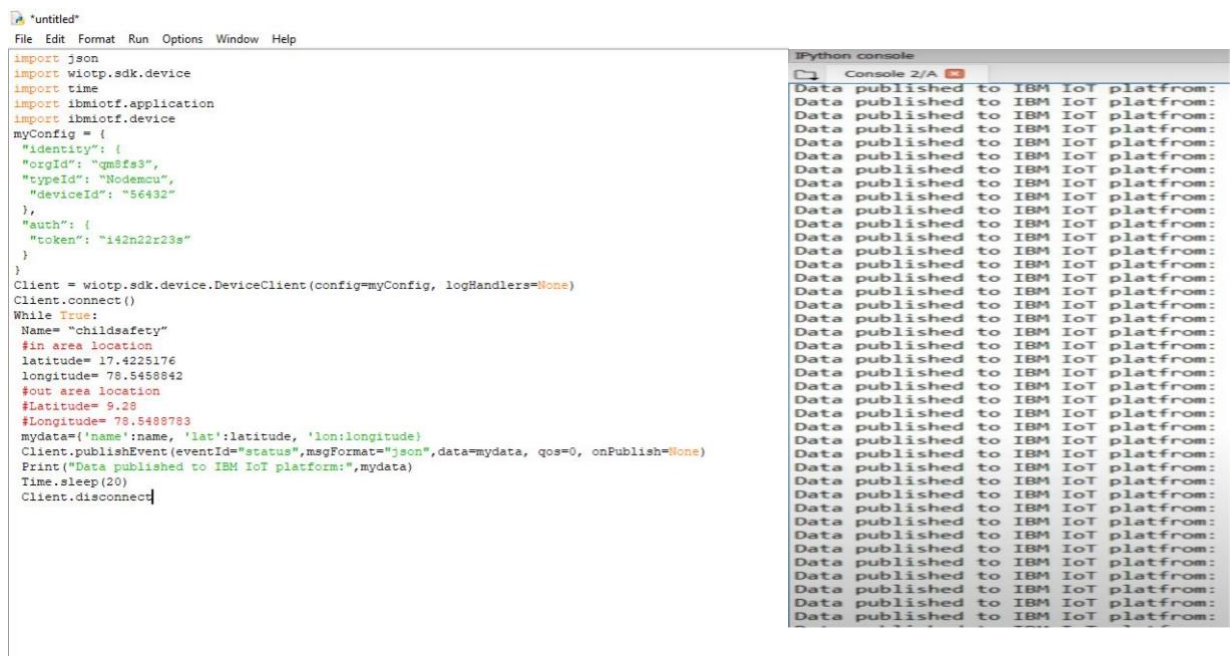

4.Editing the HTTP Request URL

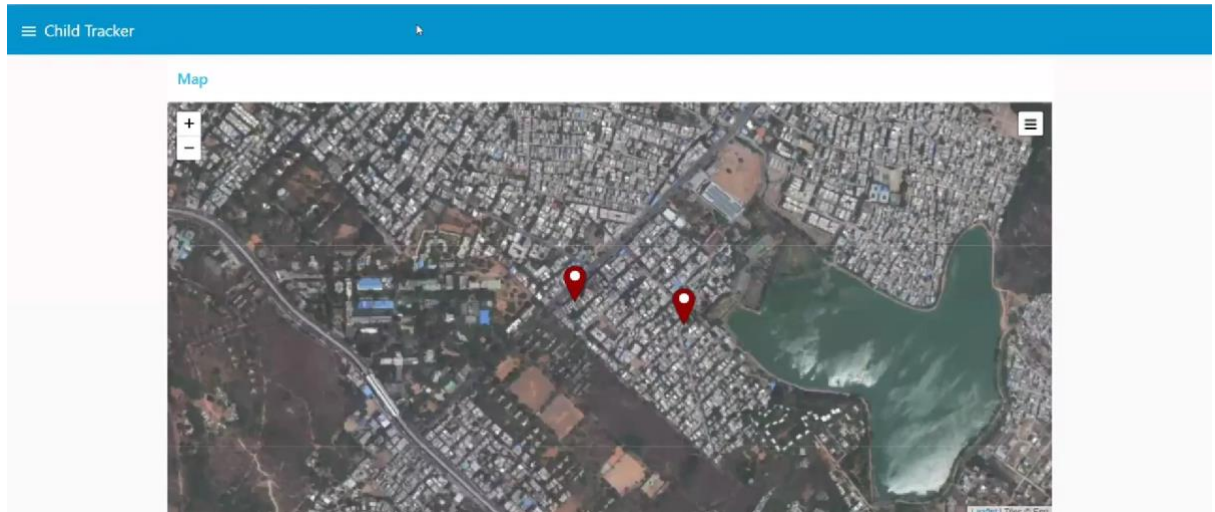

●

## 6. Python script sending requests to IBM Cloud

7. After running the script, the web UI shows “Person is not in the particular area”

**Result:**

Successfully developed the web application using Node-RED

**TEAM ID :** PNT2022TMID50197

**PROJECT :** IOT Based Safety Gadgets For Child Safety  
Monitoring& Notification
